

## KEY RING KIT

The key ring kit tube is the same as the twist pen tube. The same mandrel and 7mm drill are used.

- 1/ Prepare a block of wood 13mm x 13mm the length of the brass tube.
- 2/ Drill a 7mm hole in the centre of the tube.
- 3/ Glue the brass tube into the wood blank and leave overnight to cure properly.
- 4/ Mount the blank on your mandrel and turn to your desired shape, two can be done at the same time.
- 5/ Push fit parts into the finished tube.

Hint; Use larger blocks than the 13mm to get a variety of shapes.
